

# Week 8 Ex

---

## Knowledge Questions

- Why is every relation generated from an ERD automatically in 1NF?
- What is a non-key attribute?
- Give an example of a partial dependency?
- Give an example of a transitive dependency?
- When do we classify a table as 2NF, 3NF and BCNF?
- What do you do when normalizing from 1NF to 2NF?
- Can 3NF have data redundancies?
